That shows the HD approval/confirmation of the OSHA sampling method 1003 or the level of 10 ppb or 13 µg/m³ or less? Since you were talking with them, thought you might have a confirmation email. We had talked about the method prior and I added it to the IAP on 01.18.17 – but that was not the day the HD approved it. Need a date it was signed off on or approved by HD. Thanks.
